

## Abington Township Fire Department

### Guideline for Rope & Rigging – Anchor Points

---

This guideline shall serve as an overview for utilizing the Anchor Points when engaged in rope and rigging oriented activities at the Abington Township Fire Training Facility.

Located throughout the upper levels of the Drill Tower are multiple anchor points. These anchor points are rated for 10,000 lbs. These anchor points should be utilized when engaged in rope and rigging oriented activities versus other non rated tie off points.

Located in the Accessory Storage & Training Building are multiple anchor points. These anchor points are rated for 5,000 lbs. These anchor points are outfitted with pre-rigged rope systems for use in training with high anchor points. These anchor points are **not** to be relocated or adjusted. Furthermore, the rope systems associated with these anchor points are also **not** to be removed.

This pre-set rope system is intended to be utilized when reviewing the operations associated with high point anchors while performing at grade level.
