

Job Performance Review

Hose Line Advancement

Individual Level Competency

JPR Title

Hose Line / Hand Line Advancement

JPR Number

JPR-13-1CC

Reference

NFPA 1001 – Standard for Firefighter Professional Qualifications
IFSTA Essentials of Firefighting
ATFD Standards of Cover and Risk Analysis

Performance Criteria

Firefighter is able to deploy, flow, and advance an uncharged as well as charged hoseline. An 1 ¾" hoseline will be used. Performance criteria includes the following:

- ✓ Correct hoseline is selected
- ✓ All hose is properly flaked out
- ✓ Proper hose management is utilized
- ✓ Nozzle flow patterns are adjusted properly
- ✓ Hoseline is correctly re-packed when finished

Time Parameters

4 minutes or less to flow water

Safety Precautions

Safe operations and control of all equipment
Tripping and fall hazards minimized

Procedure

With full PPE (no SCBA for Exterior Firefighter), the firefighter shall choose and deploy the correct attack line to a specified location and call for water when ready. The nozzle will be operated in both fog and solid stream patterns. don the SCBA from a rest position and be ready for full operation within 60 seconds. Once the donning takes place, the firefighter shall raise hand to indicate the task or competency is complete. The firefighter will initiate shut down procedures and demonstrate correct re-packing of the hoseline.
