### **Reference**

NFPA 1006 – Standard for Technical Rescue Personnel Professional Qualifications

NFPA 1006 – Standard for Technical Rescuer Professional Qualifications

ATFD Standards of Cover and Risk Analysis

Product Specifications

### **Performance Criteria**

Firefighter is able to articulate various considerations for the use and need for the hand pump sprayer.

Firefighter is proficient in the use of the hand pump sprayer relative to safe operations of a work area.

### **Time Parameters**

Safe and efficient manner

### **Safety Precautions**

Space allocation to prevent injury to self or others while operating

Appropriate PPE

Attention to surroundings

### **Procedure**

- ✓ Firefighter will articulate the potential need to engage with the hand pump sprayer for items to reduce heat from friction while cutting metal. Is aware that the pump sprayer may not control sparks from cutting but may reduce likely heat impact from cutting.
- ✓ Firefighter will articulate the exposure potential of creating silica dust while breaching or breaking of concrete as prolonged exposure to concrete dust, or silica dust, is a known carcinogen.
- ✓ Firefighter identifies that the use of a fire hose may or may not be a replacement for the hand pump sprayer.

- ✓ Firefighter deploys the pump sprayer by establishing an effective water supply to be able to sustain the refilling of the pump sprayer for prolonged operations.
